

2007.12.19 - New online page

It is with great pleasure that blueCAPE launches its new website online.

The design has been done with the help of Joomla. One of its templates was used as basis to create our own template.

The extra modules and components used are:

Joom!Fish

JoomlaWorks AJAX Header Rotator and Tabs & Slides

Newsflash Module (Joomla's modified version by Daniel Hofer, and then even more modified by us)
