

2010.07.01 - blueCAPE was present at Many-Core Summer School

blueCAPE was present at Many-Core Summer School in Braga, on the week of 14th to 18th June, 2010:
Summer School: e-Science with Many-Core CPU/GPU Processors

Our objective there was to learn on how to put to good use the latent power available on modern graphics cards. We expect to start applying the technology on blueAIR, one of our current projects, in the near future.
