

2012.02.27 - blueCFD 2.0-2 and 2.1-1 Product/Service Released

blueCAPE is proud to officially present blueCFD, the updated service package available upon request, of a high quality cross-compiled build version of OpenFOAM® 2.0.x (February 14th) and 2.1.x (February 24th), for Windows XP, Vista and Seven, 32 and 64bit, with some additional tweaks, executables and scripts, in order to maintain usability under a Windows environment.

This includes the updated releases of blueCFD-SingleCore 2.0-2 and 2.0-1. There you'll also find our fully free and open source subset of blueCFD. Keep in mind that this project is still under development, but both the installer and source code are already available!

For more information about blueCFD, go to the product page [here](#).

Online shop is available [here](#). If you are located in Japan, please contact our partner InnTech.

For release notes, go [here](#).

For known working tutorials, go [here](#).

For instructions on how you can cross-compile OpenFOAM 2.0.x and 2.1.x on your own... our instructions aren't available to the general public, due to time constraints. Nonetheless, place for them is available [here](#) and the code is already accessible at the blueCFD-SingleCore project.

For any questions about blueCFD and/or blueCFD-SingleCore, please refer to our page [Frequently Asked Questions](#) about blueCFD or contact us directly through our [contact page](#).

Reminder: blueCFD users that have access to blueCFD 2.0, automatically have access to blueCFD 2.1!
