

2013.02.11 - blueCFD 2.1-2 Product/Service Released

blueCAPE is proud to officially present blueCFD, the updated service package available upon request, of a high quality cross-compiled build version of 2.1.x (February 8th), for Windows XP, Vista and Seven, 32 and 64bit, with some additional tweaks, executables and scripts, in order to maintain usability under a Windows environment.

Note: This update is already accessible to all blueCFD 2.0+2.1 users!

This includes the updated releases of blueCFD-SingleCore 2.1-2. There you'll also find our fully free and open source subset of blueCFD. Keep in mind that this project is still under development, but both the installer and source code are already available!

For more information about blueCFD, go to the product page [here](#).

Online shop is available [here](#). If you are located in Japan, please contact our partner InnTech. (InnTech.co.jp wasn't in service for at least a week during May, namely 2013-05-15)

For release notes, go [here](#).

For known working tutorials, go [here](#).

For instructions on how you can cross-compile OpenFOAM 2.1.x on your own... our instructions aren't available to the general public, due to time constraints. Nonetheless, place for them is available [here](#) and the code is already accessible at the blueCFD-SingleCore project.

For any questions about blueCFD and/or blueCFD-SingleCore, please refer to our page [Frequently Asked Questions](#) about blueCFD or contact us directly through our [contact page](#).

Co-sponsorship: The blueCFD project is part of the main project, SI R&TD project nº 2754, for the creation of an R&D core team for the development of an airflow simulation tool in the interiors and exteriors of buildings. It was funded by POR Lisboa - FEDER of European Union with a global investment of 358.008,07 € and an approved incentive of 179.004,04 €;, which ran from the 1st of January 2008 to 30th of September 2012.
