

## 2013.08.07 - Upgrading blueCAPE's on-line services

To keep on improving our online services please be aware that:

-

Registrations and on-line purchases on this website [joomla.bluecape.com.pt](http://joomla.bluecape.com.pt) will be closed while we proceed with the upgrade.

-

Expect the website to be down and registrations/purchases closed between the 12th and 16th 19th to the 23rd of August of 2013. Check our twitter feed for keeping up-to-date on how we're progressing: <https://twitter.com/bluecapept>

-

The blueCFD-SingleCore project has begun the transition from Google Code's Project Hosting <http://code.google.com/p/bluecfd-singlecore/> to SourceForge.net <https://sourceforge.net/projects/bluecfd-sc/> and Github <https://github.com/blueCFD>.

-

The transition is a consequence of: <http://google-opensource.blogspot.com/2013/05/a-change-to-google-code-download-service.html>

-

The main objective will be to keep the source code at Github, therefore providing direct forks from the original repositories.

-

The secondary objective will be to keep the downloads at SourceForge.Net, as well as a mirror of the Git repositories.

-

The Wiki and Issue Tracker will most likely be placed at Github.
